Service

Safety first: service by Holmatro

Rescue equipment more than any other type of equipment must be reliable and perform well under all circumstances. That is why Holmatro rescue tools comply with all important international safety norms such as EN 13204 and NFPA 1936. In many countries occupational health and safety legislation holds employers responsible for the safety of the equipment used by their staff. To ensure the reliability and safe operation of our products during their whole lifespan we support users of Holmatro rescue tools worldwide through our well-trained global dealer service network (see www.holmatro.com/rescue). This reflects our philosophy of being more than just a supplier: we strongly believe in long-term partnerships with our customers. Holmatro dealers are factory trained and certified, authorizing them to provide service according to our high-quality standards.

Holmatro dealers are factory trained and certified to service your rescue tools according to our high-quality standards. They have a certificate and badge to prove their qualification.

Advantages

Regular testing and maintenance of your rescue equipment by an authorized Holmatro dealer offers you many advantages:

- It ensures the safety of your rescue equipment for years to come
- It allows your tools to work longer for you and makes your investment last longer
- Holmatro dealers work with original, high-quality spare parts
- Holmatro dealers have their own spare parts stock (and quick access to the large stock at Holmatro) which minimizes the downtime of your tools
- Holmatro dealers are factory trained, know the latest technological developments and have direct contact with factory engineers; they are the best rescue tool service specialists in the market
- Last but not least, by outsourcing service you can keep focusing on your core business: saving lives!

Holmatro dealers are required to participate in periodical service courses.

Testing hydraulic rescue equipment with the help of a test frame in a service workshop.

Service programme

Holmatro's service programme includes but is not limited to:

- Periodical testing and maintenance of your rescue equipment
- Conversion of traditional dual hose systems to single hose CORE™ systems
- Upgrading existing tools with LED lights
- Changing cutter and combi tool blades
- Sales of spare parts and service consumables for tool maintenance by end users
- Service equipment advice for tool maintenance by end users

Your existing dual hose systems can be converted to single hose CORE™ systems.

Periodical testing and maintenance of your rescue equipment ensures optimal safety and performance throughout its lifespan.

Some Holmatro dealers can also provide service on location.

For more information on the available service in your area please contact your local dealer.
